

# A UNIQUE OPPORTUNITY FOR ENTREPRENEURS

**If you're in search of a new venture to increase and enhance your present business or create an entirely new business of your own, Oilfield Innovators Limited, LLC (OIL) offers a unique opportunity.**

OIL's Poleless Adaptable Laydown (PAL) System is a patented, automated system of pipe delivery to and from the floor of a workover rig by remote operation. The PAL pipe-handling system is a proven service that is safer and more cost efficient than other pipe-handling methods. By automating pipe pick-up and laydown with our PAL Unit, not only will your customers reduce expenses by saving time, but their rig safety will be dramatically enhanced. The onsite savings of the total workover time onsite, in most cases, justifies the PAL service cost. More importantly, it helps ensure safety in pipe-handling.

As the service provider of PAL Units, you can create an additional source of income for yourself. As an onsite provider of this unique service, you will function as the director of a thriving business that is high profit and low investment. Our system includes: one-man operation, low employee costs, and the free time to sell additional jobs.

In addition to the PAL, we offer a Tubular Delivery System (TDS) that mechanizes the installation of pipe, eliminating the human element and dramatically enhancing the safety of rig-assisted snubbing projects. The combination of the TDS and the PAL is revolutionizing the way that pipe is managed. Once your customers try it, they won't go back to labor-intensive methods.

**OIL has exclusive rights to the production and operation of the PAL Unit, and can provide all of the "HOW TOs":**

- Train you or your employees in PAL operation
- Service and repair the PAL
- Guide you in our proven methods for ensuring your profitability

Watch our video at [www.oilfieldltd.com](http://www.oilfieldltd.com) and read the testimonial statements of other entrepreneurs who have multiple PAL Units currently in place. Give us a call and we will send our package pricing and contract for your review.
